November 29, 2016

Dear Parents,

As previously mentioned in my letter dated November 2, 2016, all water drinking outlets were retested on November 11th. I am extremely pleased to report that the results came back exceptionally well. Every drinking outlet came back well under the required 15PPB. Please ([click here](#)) to view the results.

Although there has been some improvement in the testing results for the sink in the nurses office (59 vs 19.3ppbs), we see that there is still more remedial work required. That work has been completed today and New Wave Consultants, Inc. will be in on Wednesday, December 7th, to retest. In the meantime, we will continue to provide bottled water for use in that location. We are confident this final step will resolve the problem.

Thank you, once again, for your continued patience and understanding while we work through this issue.

Sincerely,

Ms. D. Cardello

Donna L. Cardello
Superintendent of Schools
